

The background of the top half of the slide is a composite image. On the left, there's a blue-tinted image of solar panels. On the right, there's a landscape with wind turbines under a sunset sky. The title "Horizons EnCompass Ready" is overlaid in large white text.

Horizons EnCompass Ready

Need an Outlook for Evaluating your Portfolio?*

In the increasingly complex landscape of North American power markets, understanding how the outcome of plausible futures impacts your portfolio of assets is critical.

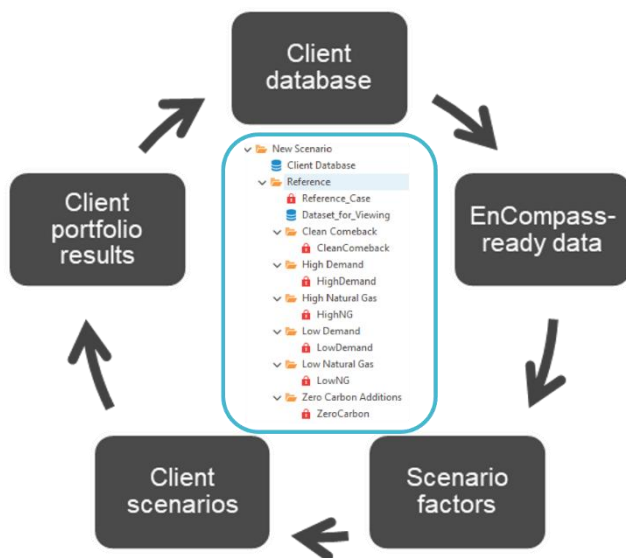

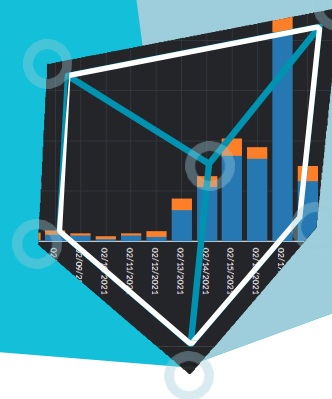

Extensively researched, benchmarked, and analyzed by industry professionals, Horizons EnCompass Ready delivers hourly price forecasts from the Horizons Advisory Outlook scenarios that spans through 2050, providing a long-term view that's essential for strategic planning and risk management. In addition to hourly prices, the assumptions embedded in each scenario are incorporated into your database to stress-test the portfolio outlook consistent with the scenarios.

Use Cases

- Screen and evaluate thermal, solar, wind, storage, and hybrid projects with probable futures.
- Identify and manage risks associated with asset selections for an integrated resource plan.
- Understand the financial value of assets across scenarios for bankability.
- Use to measure corporate profitability.

*Requires an EnCompass Power Planning Model license

DATA INSIGHTS TO RISK PROOF PORTFOLIO

Features

- Seven pre-solved scenarios
- Directly importable
- Relational data tailored to your database

Base data	
Fuel Prices	Daily Henry Hub, delivered natural gas, and oil, annual basin and delivered coal prices
Energy Prices	8,760 in EnCompass format; nodal available
Capacity Prices	Annual capacity price

Scenario data	
Fuel Prices	Factor which may be applied to base providing flexibility on different fuel assumptions
Carbon Prices	Factor which may be applied to base providing flexibility on different CO ₂ assumptions
Demand	Demand factors applicable to client assumptions
Distributed Generation	Distributed generation factors applicable to client assumptions
Capital Cost	CapEx factors applicable to client assumptions
